Summary

Hello! I'm Dylan Lambertson, a 16 year old from North Carolina. I am currently in 10th grade with a huge passion for technology. I've been on the internet for a good while and I've always been intrigued by how the internet works and everything behind it. My online passion ever since then was just to create a difference in how easily people can get there stuff online. I have around 5+ years in Customer / Technical Support for companies little to big.

Experience

Thermal Hosting

Chief Technological Officer

February 2022 - December 2022
Remote Work (Company Based In PA)

Thermal Hosting

Founded by Josh Severo

Thermal Hosting was founded in January 2022 by a good friend of mine, Josh Severo. Thermal Hosting offered very powerful and High Tech products. We offered high spec machines for Dedicated use, Game Server use, Virtual Private server use, and so much more. With my time at thermal hosting, I managed all of the systems, machines and a good amount of Cliental Relationships. With my 10 Months working for Thermal Hosting, it really did open my horizons to how big the hosting community is, so I decided to take a break and focus on personal freelance for select companies. (Thermal Hosting went out of Business in March 2023.)

Hybrid Hosting

Chief Technological Officer

April 2023 - September 2023
Remote Work (Company Based From KY)

Hybrid Hosting

Founded by Koby Pierce

Hybrid Hosting was founded on August 3, 2022, by Koby Pierce with a vision to revolutionize the hosting industry. Dissatisfied with the slow, unreliable, and expensive hosting services available in the market, Koby set out to create a faster, more affordable, and dependable alternative. Our mission at Hybrid Hosting is to provide top-notch hosting solutions for businesses and individuals, ranging from Minecraft Hosting, Dedicated Servers, Colocation, Discord Bot Hosting, Custom Built Servers, to Website Hosting. Our commitment to exceptional customer support ensures that our clients have the help they need, whenever they need it.

My Job with Hybrid Hosting was a pretty fast journey but while I was there I did learn a lot. Koby lead me through a lot of training for all of the systems we used (ex. WHMCS, DirectAdmin, and a Modified Version of Pterodactyl). With all of this, I can now feel confident enough to say I am very skilled within the industry of Sales, Customer Support, Technical Support, and Remote Help within the Hosting Industry.

Projects

Revela Network

May 2023 - Present

🔗 <https://revela.network/>

Revela Network

A highly sophisticated proxy used for evading internet censorship or accessing websites in a controlled sandbox using the power of service-workers. Works by intercepting HTTP requests with a service worker script that follows the TompHTTP specifications.

While Revela was working very well, it did require a lot of funding to keep alive, which neither me or the owner had. Which required us to shut down.

Skills

HTML

HTML (Hypertext Markup Language) is a formatting system used to display material retrieved over the Internet. It defines the structure and meaning of web content, allowing web pages to contain hypertext links that enable users to navigate between related pages.
